**Southeast False Creek  
Policy Statement**

*Toward a Sustainable Urban Neighbourhood  
and a Major Park in Southeast False Creek*

*Adopted by Vancouver City Council, October 1999*

City of Vancouver  
Planning Department

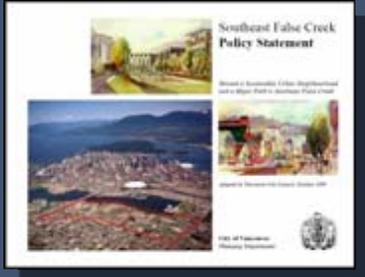

The image shows the cover of the 'Southeast False Creek Policy Statement' document. It features a watercolor illustration of a park area with buildings and trees at the top left. Below that is a large aerial photograph of the city of Vancouver with a red outline highlighting the Southeast False Creek area. To the right of the aerial photo is another watercolor illustration of a city street scene. The text on the cover includes the title, subtitle, adoption date, and the City of Vancouver Planning Department logo.

### The Press and the Urban Design Panel

#### Site to resemble 'classic fishing village'

The Olympic Village site that Robert Stern will be working on is located in the middle of the southeast False Creek lands. The city of Vancouver sold the 2.6-hectare [6.4-acre] site to Millennium Properties for \$193 million in April, a record price for undeveloped land in Vancouver.

Condo king Bob Rennie will be marketing the site, which will include 12 residential buildings ranging from four to 13 storeys high.

"The whole idea is, instead of defaulting to this ultra-contemporary [look], to build a classic fishing village," says Rennie.

"That's more the vision for the Olympic Village, and I think it's

really smart. It's sitting on the water, and it's low-rise buildings, it's not high-rise buildings."

There will be about 93,000 square metres [one million square feet] of residential space, but how many units, or what they will cost, is still in the planning stages. Stern's building is in a prime waterfront location, and will be a tiered structure of six to nine storeys, with 15,800 square metres [170,000 square feet] of space.

"I think it will stand out in terms of the quality of architecture and the materials that will be used," says Millennium's Shahram Malek.

"But it will also tie in to what's happening to other buildings

around this particular site that he is designing for. He is actually a contextual architect; he tries to build within the context."

Several architects will be working on the site. Stern will be working with local architect Lawrence Doyle on his building, while Paul Merrick and Stu Lyon will be designing several buildings each, Arthur Erickson may design a community centre.

The buildings should be completed by the end of 2009 and will be used as the athletes' residences during the 2010 Olympics. Purchasers will be able to move into their condos in the spring or summer of 2010.

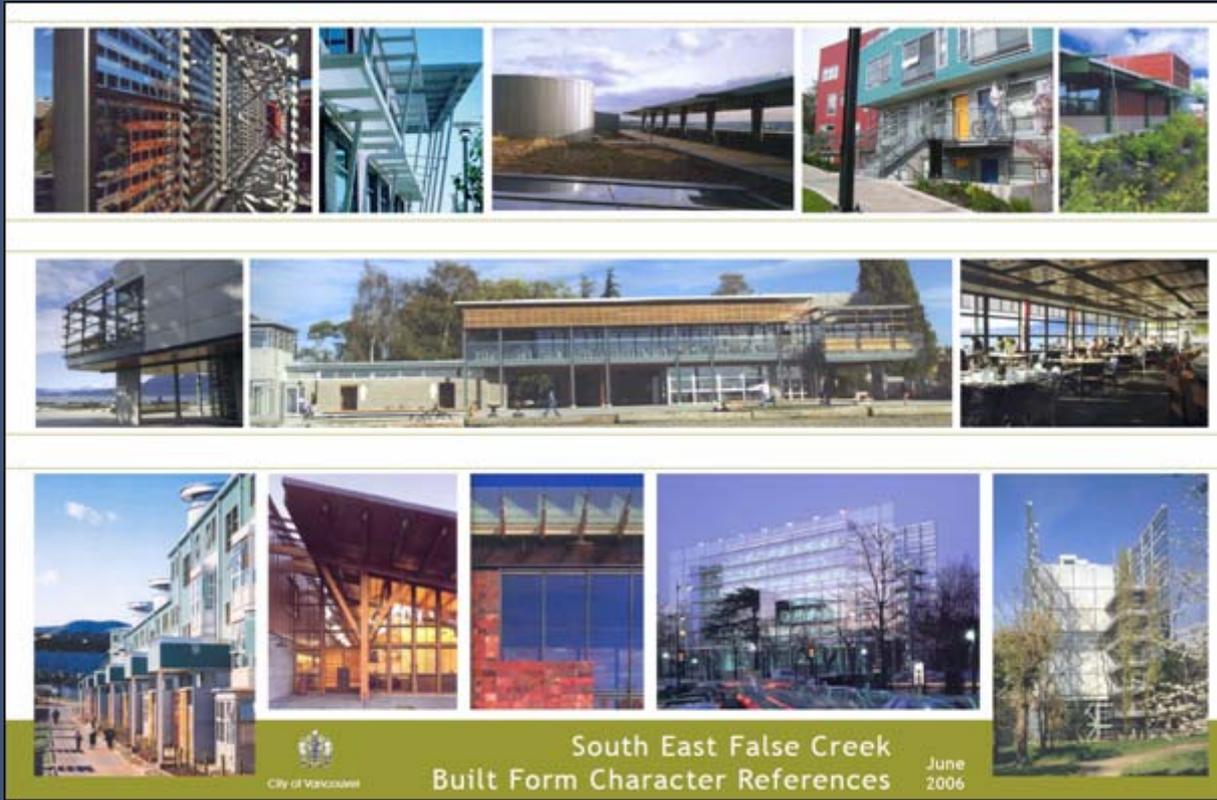

—John Mackie

## 2.1 Olympic Village

### Character and Expression

**DESIGN PRINCIPLES**

**MILLENIUM WATER - DESIGN PRINCIPLES**  
The following governing principles will inform the design of the buildings at the Olympic Village.

- 1 VERTICAL STREETS**
  - exposed circulation
  - social opportunity
  - walkable
  - view down to the street
  - view into the building
  - green edges to circulation
- 2 DAYLIGHT INSIDE**
  - daylight from two sides of each home, apartment or townhouse
  - daylight to as many rooms as possible
  - daylight to circulation
- 3 AIR THROUGH**
  - corner or through suites wherever possible
  - large or multiple opening windows
  - open corridors where possible
- 4 HORIZONTAL STREETS ABOVE GRADE**
  - corridors with green edges where possible
  - suite entry doors with presence
  - corridors with daylighting where possible
- 5 RESPONSIVE BUILDING FACE**
  - solar screening on south and west sides
  - bigger windows on north sides
  - smaller windows or shading on bright sides
- 6 USEFUL OUTDOOR TERRACES**
  - space for table and chairs
  - privacy control
  - integrated with unit layout
- 7 RESPONSIVE STREET LEVEL UNITS**
  - private street/public street response
  - east side/west side response
- 8 INTEGRAL AMENITY SPACES**
  - interior amenity spaces that are integrally connected to common outdoor space
  - amenity spaces are creatively designed
  - amenity spaces are integrally associated with circulation and preferably with vertical streets
  - amenity spaces are the 'public plazas' of the interior circulation
- 9 VIEW FROM EVERY FLOOR**
  - every floor in every building should have a common outlook over outdoor green space in concert with common access to natural daylight
- 10 DAYLIGHT TO UNDERGROUND SPACES**
  - daylighting via skylights, stairs, and light wells should be provided to underground areas wherever possible
